Financial Ratios	The Expense to Revenue ratio can be calculated as $\text{Total Expenses} / \text{Revenue} = 8,00,000 / 10,00,000 = 80\%$ (sample_pnl_statement.pdf, Page 1).

Visual Financial Overview (Extract Indicators)

2. Gap Detection (Critical Reminders)

- **Missing Statement/Data:** Balance Sheet
Why it matters: To assess the company's liquidity position and financial health
Business Impact: Inability to determine the company's cash and cash equivalents, accounts payable, and accounts receivable
- **Missing Statement/Data:** Cash Flow Statement
Why it matters: To evaluate the company's ability to generate cash and pay its debts
Business Impact: Inability to assess the company's cash inflows and outflows

3. Forward Looking Flags

- **Risk Category:** High Expense Ratio

Observed Pattern: The company's total expenses are 80% of its revenue, which may indicate a risk to profitability if expenses are not managed effectively

Source: sample_pnl_statement.pdf, Page 1

- **Risk Category:** Dependence on Salaries and Other Expenses

Observed Pattern: The company's highest expenses are Salaries and Other Expenses, which may indicate a risk to profitability if these expenses are not managed effectively
